

# Fast-Track EU RED

## Cybersecurity Compliance

Mandatory cyber requirements under Articles 3.3 (d), (e), and (f) take effect on 1 August 2025. Get compliant in days, not months, with Finite State's tiered RED certification services.

"Finite State turned RED compliance from a road-block into a 10-day sprint. The continuous scans keep us ahead of CRA, too."

### The Compliance Gap

#### 2025 Reality

New RED cyber clauses enforced, EN 18031 now harmonized

#### Traditional Lab Offer

"Test-only" bundles for \$17-29k, pass/fail PDF, no guidance

#### The Finite State Solution

RED Quick-Test from \$19.5k delivers pass/fail + root-cause fix plan, SBOM, and CRA-ready evidence

### Why Finite State?

- **Binary-Native Analysis** – Digs into firmware that source-code tools can't see
- **SBOM-Driven Evidence** – Aligns with EN 18031, CRA & U.S. Cyber Trust Mark for cross-framework compliance
- **Continuous Vulnerability Monitoring** – Meet post-market obligations ignored by test labs
- **NB Ready Documentation** – We package results for your chosen Notified Body

 **10-day turnaround**

 **3 tiers**

 **1 trusted partner**

### Results That Matter

**83%**

**defect reduction**  
in first re-test cycle  
(avg. across pilot devices)

**50%**

**faster time-to-certificate**  
vs. traditional labs (10-days vs. 20-day mean)

**55% +**

**gross margin preserved**  
thanks to platform automation

## How the Engagement Works

Upload firmware & docs:  
Secure cloud ingest

Automated firmware analysis:  
SBOM & CVE map in hours

Hands-on functional testing:  
Network resilience, privacy,  
fraud

Actionable report:  
Clause-by-clause results +  
Jira-ready tickets

Continuous monitoring:  
Alerts on new vulnerabilities  
for the product's lifecycle
